

Blue Ocean Wireless CEO presents at Digital Ship Singapore

Presentation outlines “Right Product, in the Right Market at the Right Time”

Dublin, Ireland, 17 September, 2007: Blue Ocean Wireless (“BOW”), an Irish company delivering GSM communication capability for the merchant maritime sector, today announced that, CEO, Robert Johnson, will present at the *Digital Ship* Maritime information technology conference and exhibition in Singapore. Mr. Johnson will present at 12.00pm on 18 September at the Suntec Convention Centre in Singapore.

During the presentation, Mr. Johnson will outline the benefits of BOW’s merchant maritime GSM crew connection solution and that this unique product, which is markedly different from existing ‘crew calling’ solutions, is the right product in the right market at the right time. A copy of the presentation is available on the BOW website www.blueoceanwireless.com

About Blue Ocean Wireless

Blue Ocean Wireless is an Irish company focused on expanding communication capability in the merchant maritime sector. Blue Ocean Wireless provides, for the first time, GSM connectivity for seafarers in deep ocean water, where no other network exists. This allows users to make and receive voice calls, send and receive SMS text messages and, in time, browse the internet using their existing handsets. Blue Ocean Wireless’ offering is based on Altobridge’s unique ‘Aeronautical & Maritime Gateway Platform’™ technology. This technology can also be used, in conjunction with RFID technology, to track and monitor shipping containers while they are in transit at sea.
